Package contents:
1x USB 2.0 hub
1x operating instructions

System requirements:
• Operating system Windows® 2000 from SP 3, XP from SP 1, Vista or Mac™ OS 10.x
• Free USB connection, preferably USB 2.0

Safety instructions:
You have acquired a high-quality, electronic accessory for your computer which is universally useable. Please observe the following points:
• Protect the device against pressure and impact.
• Do not expose the device to moisture. The precision contacts can be damaged.
• To not connect the device if the device, the connection lead or the mains adapter are damaged.
• The device or other components must only be repaired in a specialist shop or in a service centre.
• Only use the enclosed original mains adapter or original spare parts.
• Only use the enclosed USB connection cable without extension. Otherwise, the data security can be affected.
• Make sure that all connected devices are CE-marked.
• Avoid heat sources and direct sunlight exposure.
• Attention! Keep electrical equipment and electronic devices out of reach of children.
• Attention! Keep packaging materials out of reach of children! Danger of suffocation!
• Attention! This is an apparatus of the class A. This apparatus may cause radio interferences in the living area; in this case, the operator can be demanded to take appropriate measures.

Putting into operation:
1. Switch on your PC and wait until it has started up. Connect the USB hub with your PC/notebook by means of the enclosed USB cable.
2. Please make sure that no terminal device is connected when you install the USB hub.
   Note: When connecting and disconnecting the USB hub and the USB devices, different messages can appear on your screen. Contact a specialist or consult the manual of your computer or operating system if you have any questions.
3. Now you can connect your USB peripheral devices (e.g. printer, scanner etc.) to the USB hub. When installing the devices you have to install every devices separately, i.e. please wait until the drivers of the respective device have been completely installed before installing another device.
4. It is also recommendable – as far as this is possible – to supply the terminal devices which are connected to the hub with power of their own.
   Note: When connecting the USB hub, you do not have to install drivers (are included in the operating system Windows® 2000 from SP3, XP from SP1, Vista or Mac™ OS 10.x). A driver may be necessary for the connected USB devices. This one can be obtained from the manufacturer of the respective device or when purchasing such a device.

Note on environmental protection:
After the implementation of the European Directive 2002/96/EU in the national legal system, the following applies:
Electrical and electronic devices may not be disposed of with domestic waste.
Consumers are obliged by law to return electrical and electronic devices at the end of their service lives to the public collecting points set up for this purpose or point of sale. Details to this are defined by the national law of the respective country. This symbol on the product, the instruction manual or the package indicates that a product is subject to these regulations. By recycling, reusing the materials or other forms of utilising old devices, you are making an important contribution to protecting our environment.
